System Highlights:

Marine Asset Protection

eNav.my is a live, 24 hour, web-based service, monitoring protection zones around subsea and surface assets. It monitors the behaviour of vessels in and around these zones and constantly feeds vessel position back to a central control hub for detailed analysis. eNav.my raises an alarm if the analysis shows that a vessel is exhibiting potentially damaging behaviour.

- ✓ Alert System
- ✓ Real time vessel tracking with AIS
- ✓ Nautical Chart
- ✓ 12 months data held online
- ✓ Powerful Data Analytics

Sector

- Maritime Authority
- Shipping companies & cabotage
